

Is Saudi Arabia building a perfect octagon?

The incredible new \$387bn city being built in shape of perfect octagon. (Image: Neom) Saudi Arabia is building a new \$387 billion high-tech city called the Oxagon on the Red Sea coast. The city is designed as a perfect octagon. Oxagon is part of an ambitious project being carried out by a company called NEOM.

Will Saudi Arabia open Oxagon?

Saudi Arabia opens Oxagon, a floating city powered by 100% clean energy. The port is part of NEOM, a gigaproject that aims to become a global hub for innovation, logistics, and clean energies. Oxagon is expected to be home to 90,000 people by 2030.

What does Oxagon mean for Saudi Arabia?

Oxagon is part of an ambitious project being carried out by a company called NEOM. This massive development comes under Saudi Arabia's 'Vision 2030,' which aims to diversify the country's economy beyond oil. The city will be the world's largest floating structure and is expected to become a global hub for trade, technology and clean energy.

Is Oxagon the world's largest green hydrogen production facility?

It will be home to the world's largest green hydrogen production facility, supporting the Kingdom's push for clean energy. Oxagon is one of several projects under NEOM, which also includes The Line, a futuristic city designed as a 100-mile linear development.

Where is Oxagon located?

Strategically located on the Red Sea coast near global shipping lanes, Oxagon is the ideal base for the factories of the future. Oxagon's manufacturing ecosystem is designed to offer a competitive advantage and comprehensive support for companies looking to establish operations in the region.

What is Oxagon's manufacturing ecosystem?

Oxagon's manufacturing ecosystem is designed to offer a competitive advantage and comprehensive support for companies looking to establish operations in the region. Manufacturers coming to Oxagon Industrial Quarter will gain immediate market access to the development underway of NEOM, its regions and sectors.
