

Who are Oman's OQ and Kuwait's EnerTech?

Oman's state-held energy company OQ, Hong-Kong-based green fuels developer InterContinental Energy, and Kuwait's government-backed clean energy investor and developer, EnerTech, announced on Tuesday the plan for one of the biggest facilities of green hydrogen in the world.

How is energy used in Oman?

Total energy supply (TES) includes all the energy produced in or imported to a country, minus that which is exported or stored. It represents all the energy required to supply end users in the country.

How much does it cost to generate power in Oman?

It has a 54-m rotor diameter and a working velocity between 3 and 10 m/s. With a USD\$1.2 million capital cost and USD\$750,000 maintenance cost over 20 years, the power generation cost would be USD\$0.119/kW. This cost is the lowest possible for generating power in the north of Oman.

Does Oman have potential for wind energy?

Oman has significant wind energy potential, particularly in its coastal areas in the South and in the mountains situated north of Salalah. The highest wind speeds have been identified in the Dhofar Mountain Chain, which is north of Salalah. However, the North and Western parts of Oman are considered low wind speed areas.
