

The Global Register of Introduced and Invasive Species (GRIIS) presents validated and verified national checklists of introduced (alien) and invasive alien species at the country, territory, and associated island level. Checklists are living entities, especially for biological invasions given the growing nature of the problem. GRIIS checklists are based on a published methodology and ...

The ORC system will improve the number of connecting shafts from 5 to 9 between the clutch cover, plate & flywheel. The ORC improve the mating of the clutch cover with the plates by using a circular disk rather than a pentagon shaped disk. The circular shaped clutch cover & plates distribute the sudden torque generated evenly and will prevent ...

Los procesos industriales de energía intensiva generan grandes cantidades de emisiones residuales que generalmente no son aprovechadas. Sin embargo, tiene sentido utilizar la energía térmica, tanto por su aspecto económico como ecológico, con relación a los costes cada vez mayores de la energía, a la necesidad de competitividad de las empresas, y a las normativas ...

Steam screw expanders can recover heat energy by converting low-, medium-, and high-temperature steam into electrical energy. With a steam screw expander, power plants can accept saturated, dry, or overheated steam. They can also be combined with our ORC systems to maximize overall thermal efficiency and recover the maximum amount of energy ...

Welcome to the Official Attendee Housing Site for the Global Congress on Advancing Nursing Excellence in Patient Safety, scheduled to take place in the beautiful and vibrant city of Amsterdam, Netherlands.. Conference Dates: June 23-24, 2025. About the City Amsterdam, the capital of the Netherlands, is located in North Holland and attracts nearly 5 million tourists ...

Mitsubishi Heavy Industries Marine Machinery & Engine"s (MHI-MME) newly developed waste heat recovery system, Hydrocurrent Organic Rankine Cycle (ORC) Module 125EJW, has started operating on-board Maersk Line"s vessel, christened Arnold Maersk.. The ORC system, developed in collaboration with Calnetix Technologies, uses extremely low ...

@misc{etde_21059244, title = {Dynamic modeling and simulation of an Organic Rankine Cycle (ORC) system for waste heat recovery} author = {Wei, Donghong, Lu, Xuesheng, Lu, Zhen, and Gu, Jianming} abstractNote = {The paper proposes two alternative approaches for the design of a dynamic model for an

Organic Rankine Cycle (ORC) to be used for the design ...

57 entries from 10 nations in Europe and beyond begin registration Friday, with racing to start on Monday. Teams are gathering now at Mariehamn, the Åland island venue near Finland that is hosting the 2024 ORC European Championship. Organizers for this event held over August 9-17 include the Finnish Offshore Racing Association and Ålandska ...

The program is the U.S. response to the legacy of nuclear testing that occurred in the Republic of the Marshall Islands from 1946 to 1958. Program activities fall into two main areas and focus on the Atolls of Bikini, Enewetak, Rongelap, and Utrik.

The legal system in the Marshall Islands is patterned on common law proceedings as they exist in the United States. The country has a judicial branch composed of a Supreme Court, a High Court, a Traditional Rights Court, District Courts, and Community Courts. The Supreme Court is made up of one Chief Justice and two Associate Justices.

The spotlight of European ORC racing will shine on the picturesque Åland Islands this August as it plays host to the highly anticipated ORC European Championships 2024. Organized by the Finnish Offshore Sailing Association, ...

The spotlight of European ORC racing will shine on the picturesque Åland Islands this August as it plays host to the highly anticipated ORC European Championships 2024. Organized by the Finnish Offshore Sailing Association, the Offshore Racing Congress (ORC) and hosted in the ÅSS Marina, this premier event is slated to take place from August 9th-17th 2024.

The new Steam & Power (ST& P) ORC system is launched by Turboden together with Bono Sistemi, technical partner of the project. It allows the production of electricity and a valuable high temperature heat carrier, such as steam, directly exploitable in ...
