This is a significant step forward for SGS and its customers and substantially strengthens the platform to deliver our mission of delivering the DER management and ...

Möchte natürlich auch die smart grid Schnittstelle nutzen. Ich habe mich nach der Anleitung von Michel gehalten. Das sg ready Symbol leuchtet im display, aber leider passiert nichts. Gehen bei sg ready die heizstube an, oder lädt das Auenget? Ich möchte erstmal tww zum Laufen haben und dann soll auch gerne der Puffer aufgeheizt werden.

SG Ready (short for smart grid ready) is a label certifying that a heat pump or a complimentary management technology can respond to defined external control signals. The label was introduced in 2012 by the German heat pump association (Bundesverband Wärmepumpe, BWP) together with 17 heat pump manufacturers.

The new Ecodan FTC6 controller is Smart Grid ready with the additional built in quiet mode interface. Other features include an improved easy system set up through step by step installation wizard and intelligent room temperature control as standard. It also includes energy monitoring, showing consumed and produced energy.
