

Where is Pitcairn located?

It comprises the islands of Pitcairn, Henderson, Ducie and Oeno. Pitcairn, the only inhabited island, is a small volcanic outcrop situated in the South Pacific at latitude 25.04 south and longitude 130.06 west. It is roughly 2170km (1350 miles) east south-east of Tahiti and just over 6600km (4100 miles) from Panama.

Is Pitcairn Island a volcanic island?

Pitcairn Island is the only inhabited island of the Pitcairn Islands, in the southern Pacific Ocean, of which many inhabitants are descendants of mutineers of HMS Bounty. The island is of volcanic origin, with a rugged cliff coastline. Unlike many other South Pacific islands, it is not surrounded by coral reefs that protect the coast.

Where are the inhabited islands near the Pitcairn Islands?

Henderson Island accounts for 86% of the land area, but only Pitcairn Island is inhabited. The inhabited islands nearest to the Pitcairn Islands are Mangareva (of French Polynesia), 688 km to the west, [note 2] as well as Easter Island, 1,929 km to the east.

Who are the people of Pitcairn Island?

With a population of only around fifty, the people of Pitcairn are descended from the mutineers of HMAV Bounty and their Tahitian companions. Pitcairn Island is approximately 3.2km (2 miles) long and 1.6km (1 mile) wide with the capital Adamstown located above Bounty Bay and accessed by the aptly named road, "The Hill of Difficulty".
