

Can solar energy replace fossil fuels on Pitcairn Island?

Pitcairn's authorities have launched a renewable energy project designed to replace fossil fuels with solar energy. The goal is to replace 95% of the current diesel consumption on Pitcairn Island (75,000 liters per year) with a combination of energy saving and solar electricity through the installation of a hybrid photovoltaic solar energy system.

Are the Pitcairn Islands Green?

Pitcairn Islands, a group of five islands with a total area of 47 km<sup>2</sup> and which constitute one of the most remote archipelagos in the world, turn to safer, greener energies that best meet the needs of the population. Pitcairn's authorities have launched a renewable energy project designed to replace fossil fuels with solar energy.

Pitcairn Island, Sept. 3, 1831. ... there was no energy left, and much of the island reverted to natural bush. In 1868, some of the Norfolk Island settlers, including old John Buffett, who was to live to the ripe old age of 93, visited Pitcairn and urged their relatives to rejoin the now wealthier community. But nothing happened except that ...
