

What is pixiibox?

Our modular building block called the PixiiBox is the core component in all our systems. PixiiBox opens the door for both energy saving services and income generating services through the concept of value stacking. I agree to receive other communications from Pixii AS.

What is the pixiihome app?

The PixiiHome App lets you manage your energy use by adding automation and behavior-driven services to your home. Optimize your energy storage and consumption with smart functions like peak shaving, arbitrage, and PV self-consumption, reducing costs while increasing energy efficiency.

Are Pixii energy storage systems safe?

Installation, commissioning and operation of Pixii energy storage systems. General precautions Although this system incorporates protective circuits and other security features, it may still be destroyed, damaged, work poorly or shorten its

Why should you choose Pixii as a modular energy storage solution?

With cutting-edge technology, the Pixii modular energy storage solution gives you a wide range of functions, allowing you to unleash your growth potential. We are the first generation to feel the sting of climate change, and we are the last generation that can do something about it I agree to receive other communications from Pixii AS.

Why should you choose pixiibox?

Our modular approach allows you to scale to your needs, speeding up the transition to green energy. Our modular building block called the PixiiBox is the core component in all our systems. PixiiBox opens the door for both energy saving services and income generating services through the concept of value stacking.

Pixii Home enables homeowners to get more out of solar energy, cut electricity bills with smart energy saving functionality, and generate income by renting out battery capacity to support the local grid through ...

Australia is experiencing a solar boom, with rooftop solar panels installed on over 30% of homes and a growing number of large-scale solar farms. However, the grid wasn't originally designed to handle this level of decentralized, intermittent generation. ... Darren Nankivell, Pixii Global Product Manager - Off-grid Solutions, Greater ...

Pixii is pleased to announce the successful delivery of our first PowerBase XL preconfigured skid solution. This marks a significant step in providing efficient energy storage solutions for energy-intensive applications. Pixii PowerBase XL - Preconfigured skid, 540kW up to 1,8MWh A practical solution for energy needs

4 ???&#0183; We are proud to announce that Pixii has been awarded ISO 9001:2015 and ISO 14001:2015 certifications. These globally recognized standards validate our dedication to delivering energy storage solutions with high quality while maintaining a strong focus on environmental responsibility.

Pixii assesses if a component is faulty and requires replacement, after which the customer submits an RMA form on pixii . Depending on spare part availability, Pixii will promptly dispatch a replacement component in similar condition. Once received, the customer can replace the part and return the faulty one in its original packaging.

Named Norway's fastest-growing tech company in 2023, Pixii AS has developed a fully integrated, modular and scalable technology which enables homes and businesses to make the most of existing or new solar installations, along with applications like fast EV charging. Beyond reducing energy costs, Pixii's solutions enable building owners to ...

The Pixii solution is fully integrated and comes with our user-friendly Pixii gateway web app, allowing for easy installation with minimal on-site work. Our team of engineers have combined their extensive expertise and knowledge of the market to create our revolutionary Pixii battery energy storage system.

I agree to receive other communications from Pixii AS. In order to provide you the content requested, we need to store and process your personal data. If you consent to us storing your personal data for this purpose, please tick the checkbox below. I agree to allow Pixii AS to store and process my personal data.

Pixii's BESS provides a fully integrated solution that seamlessly distributes power from solar PV panels, AC/DC coupling, and other energy sources, storing excess energy for later use. It ensures reliable power supply while optimizing cost savings through peak shaving and load management.

The Pixii battery energy storage system is modular, easy to scale and quick to deploy. It comes with smart functionality, allowing you to reduce your energy costs, open new revenue streams, and get the most out of your PV installation ... Pixii Home family. Residential battery energy storage for private houses compounds and neighbourhoods ...

The Pixii battery energy storage system is designed to be managed and controlled remotely. The built-in communication gateway, allows you to connect with all elements within the system, as well as external sensors and other hardware at your site.. And with the Pixii Gateway web-app, you can configure a wide range of services, monitor and optimize

Pixii has signed a memorandum of understanding with the Provincial Electricity Authority (PEA) of Thailand and I2 Enterprise Public Company Limited to collaborate on a project to develop battery energy storage systems to support PEA's power grid.

Pixii is happy to announce that Rexel will distribute Pixii's products in Sweden, a key market for Pixii's smart

energy storage solutions. Together with its installation customers, Rexel will target commercial and public property owners and industries with Pixii PowerShaper cabinets as well as the residential market with the newly launched ...

At work in this case: Pixii PowerShaper, 20 x 50kW modular energy storage with an output of 1MW/1MWh. Contact us Pixii Oslo E-mail: [Show Email](#) Visiting address: Sommerrogata 13-15, 0255 Oslo. Project manager Pixii Moez Tahir Technical sales manager, Nordics and Baltics Tel. +47 969 41 230 E-mail: [Show Email](#)

Cost-saving battery services. Arbitrage: Maximizes the use of energy purchased at low prices from the grid, enhancing cost efficiency by optimizing consumption during high-cost periods. Peak shaving: Lowers energy costs by active and reactive reduction of peak demand charges. Power boost: Grid upgrades can be expensive and time consuming. Avoid the ...
