

Are home batteries a good way to store energy?

"At present, home batteries are mainly being installed as a way to store your self-generated energy. On the other hand, we also see that the energy landscape is evolving and new energy mechanisms are also being introduced to help facilitate the energy transition. One of these mechanisms is peak load.

What is a home backup battery?

A home backup battery provides a safety net when you need to protect your family against a power loss. It delivers clean power, unlike a home standby generator that relies on fossil fuels. With battery backup solutions, you get energy security and peace of mind.

Are home batteries necessary?

Home batteries are not essential. However, they are a great tool for getting the most out of your energy. Solar panels only create energy in daylight. Buying a battery means you will be able to utilise this energy during hours when the sun is not shining.
