

4 ???· Saule Technologies S.A. engages in the research, development, manufacturing, and sale of perovskite solar cells. The company's products portfolio includes energy-harvesting solar sun blinds, solar carports and others, electronic shelf labels, and photovoltaic glasses. Saule Technologies S.A. was founded in 2014 and is based in Warsaw, Poland.

Saule Technologies on the way to zero defect manufacturing as its production line becomes a demo-site for the Platform-ZERO project. 31-01-2023. dr Konrad Wojciechowski for Polityka: "Perovskite solar cell by Saule Technologies is the first flexible solar cell in the world to pass the damp heat test" ... Olga Malinkiewicz among the "100 ...

In Lublin (Poland), on August 24th, Saule Technologies launched the first installation of photovoltaic blinds - sun breakers with perovskite solar cells. This first in the world commercial implementation of perovskite solar cell technology was a collaboration with the client - the company Aliplast.

According to a report of the United Nations, buildings and construction together account for 36% of global final energy use and 39% of energy-related carbon dioxide (CO₂) emissions. The energy intensity per square meter (m²) of the global buildings sector needs to improve on average by 30% by 2030 (compared to 2015) to be on track to meet global climate ambitions set forth in ...

Saule Technologies General Information Description. Developer of commercial photovoltaic cells designed to make solar power accessible to everyone. The company develops innovative solar cells based on perovskite materials using ...

Such a transaction may end with the licensing of the technology, the investor's entry into the Company or the sale of shares of Saule S.A. Regardless of the final outcome of the transaction, we want the technology of perovskite cells to have a chance to conquer the world and gain recognition," commented Olga Malinkiewicz, the SEO of Saule ...

Saule Technologies is a high-tech company that develops innovative solar cells based on perovskite materials. We have pioneered the use of inkjet printing for the production of flexible, ...

Saule Technologies is partnering with Google Cloud and Columbus Energy to develop internet of things solutions using perovskite solar cells. ... country director of Google Cloud in Poland, said ...

Saule Technologies has received funding from Poland's green energy leader Columbus Energy and multimillionaire Japanese investor Hideo Sawada. Her discovery earned her an article in the journal Nature as well as ...

Both enterprises, Fabka Poland and Saule Technologies, put great value in caring for the environment, innovation and sustainability. Taking the unmatched potential of the perovskite technology in consideration it is to no ...

After returning to Poland, she founded Saule Technologies, whose aim was to commercialise the new technology. She found experienced business partners - Piotr Krych and Artur Kupczunas, and in a very short time she built an international team of specialists. The company has one of the most modern optoelectronic laboratories in Europe.

Poland-based Saule Technologies, a perovskite solar tech company, has launched its first installation of photovoltaic blinds - sun breakers with perovskite solar cells. This world's first commercial implementation of perovskite solar cell technology was a collaboration with Aliplast, said the company.

The results open new business opportunities for Saule Technologies, a company based in Wroclaw, Poland. Flexible perovskite photovoltaic devices produced by Saule are very well suited for powering ...

Zarząd Saule Technologies S.A. z siedzibą w Warszawie [Emitent] informuje, że w dniu dzisiejszym Saule S.A. [spółka zależna Emitenta, dalej SAULE] otrzymała od T&V Rheinland Solar GmbH z siedzibą w Kolonii [Niemcy] deklarację spełnienia przez wyprodukowane przez SAULE perowskitowe moduły fotowoltaiczne dla produktów konsumenckich ...

Saule Technologies is a high-tech company that develops innovative solar cells based on perovskite materials. We have pioneered the use of inkjet printing for the production of flexible, lightweight, ultrathin, and semi-transparent photovoltaic modules.

Saule Technologies has received funding from Poland's green energy leader Columbus Energy and multimillionaire Japanese investor Hideo Sawada. Her discovery earned her an article in the journal Nature as well as an award from MIT and top spot in a competition organised by the European Commission.
