

Aside from the air vehicle technology, the F-22's avionics and software were unparalleled in their complexity and scale. We're talking 1.7 million lines of code, the majority involving the mission systems such as processing radar data.

Education takes flight with POWERUP designed especially for educators. We recognize the importance of hands-on learning and the power of flight to spark curiosity and engagement. Discover a range of PowerUp educational toys that bring science, technology, engineering, and math (STEM) concepts to life. Get more out of

PowerUp assiste les integrateurs et les opérateurs de flottes de véhicules électriques avec des solutions permettant une gestion plus durable et rentable des batteries de leurs véhicules. Collectez et traitez les données de fonctionnement de la batterie, optimisez ses performances et prévoyez la future maintenance nécessaire.

Battery Insight is a cloud-based solution for analyzing and monitoring battery safety and performance. It processes your batteries' operational data and delivers crucial, actionable insights to help you use your batteries more safely, reliably, and sustainably.

Founded in 2017, PowerUp develops advanced battery analytics solutions that ensure a safe and reliable usage of batteries. By considering their actual use, our advanced algorithms and software allow to prevent critical issues, as well as ...
