

Wind power has grown to become the most efficient renewable energy source during the past two decades. In addition to the number of wind turbines, the capacity of the individual units has grown enormously. With more than 9 GW of installed capacity worldwide, both offshore and onshore, we are already one of the largest operators of renewables.

RWE Renewables Europe & Australia, the Fraunhofer Institute for Solar Energy Systems (ISE) and Brandenburg University of Technology Cottbus Senftenberg as well as other partners are aiming to further develop the innovative floating PV technology. The objective of the "PV2Float" research project is to test several floating PV systems with ...

More than 200 employees develop, build, operate and maintain our renewables projects. Our team comprises skilled project managers, project engineers, and technicians, as well as many other experts in different fields as RWE creates ...

Bahasa Indonesia; Italiano; ... RWE AG is a German multinational energy company headquartered in Essen.
