

What is the SolarFoot?

The SolarFoot is a simple and cost-effective pedestal for L-Foot (not included) attachment of rail-mounted solar PV systems. Its unique design is compatible with all rail producer L-Foot components, ensuring a durable and weathertight solution for the life of the roof.

Can solarfoot be attached to a wood deck?

Designed to straddle minor striations in your roof panel for attachment into decking or structure, can be fastened into a variety of substrates, including the wood deck, wood timber purlins or steel purlins. SolarFoot is compatible with almost any trapezoidal rib, exposed-fastened profile. Minor Box: \$4.31 Qty: 70 Master Box: \$4.23 Qty: 210

How do I install a solarfoot?

Call your Authorized S-5! Distributor for current pricing. No surface preparation is necessary. Simply wipe away excess oils and debris; peel the release paper, align and apply. Determine the location of the supporting structure of the roof. Install screws through the pre-punched holes in the SolarFoot into the structure below.

S-5!, Clamp, SolarFoot mount for Trapezoidal metal roofs, with butyl pads, (4) 8mm mounting holes and (1) M8-1.25 X 17mm Threaded Stud with Flange Nut, fasteners not included, for direct L-Foot mounting, SolarFootThe S-5! SolarFoot is a simple, cost-effective pedestal for L-Foot attachment of rail-mounted solar PV. The bracket can be used to mount any L-foot to exposed ...

The SolarFoot provides an ideal mounting platform to attach the L-Foot of a rail-mounted PV system to the roof. This solution is The Right Way to secure rail-mounted solar systems to exposed fastener metal such as AG-Panel or R-Panel. Manufacturer Part Number: S-5 SolarFoot Shipping Weight: 0.3 lb

Using the roof's integrated "rails" makes solar mounting quick and convenient. Pared to rail mounting, the PVKIT: reduces the weight of the mounting system by 85%; provides 25% better load distribution uses 70% fewer components lowers material costs; With total mounting system weight below 3.5 lbs./kW (1.6kg)/kW compared to 19 lbs. (8.6 kg)/kW for railed systems, the ...

S-5! SolarFoot Brackets Attachment For Metal Roofs. The S-5! SolarFoot Brackets are specifically designed for secure attachment to metal roofs, providing a reliable solution for mounting solar panels. With their durable construction and innovative design, these brackets ensure stability and longevity for solar installations on metal rooftops.

The new SolarFoot assembly ensures a durable weathertight solution for the life of the roof. Special factory applied butyl co-polymeric sealant contained in a reservoir is The Right Way, ...

The SolarFoot should be placed in the flat of the panel, between the ribs. It is designed to straddle striations or minor stiffening ribs when necessary. The SolarFoot must be mounted directly over and into the supporting structure of the roof, i.e. wood decking, wood or steel purlins, or trusses, NEVER into the metal roofing material alone.

Disruptive Innovation In 1991, we created a whole new product category that changed the way people thought about metal roofs - making it simple and easy to mount things to metal roofs in prudent, engineered ways that cause no harm to the roof. The real game-changer was that these innovative standing seam roof clamp technologies actually cost less "the right way" than all the ...
