

What is the Holcomb energy system?

When fully deployed, the Holcomb Energy System technologies offer a sweeping answer to the most pressing problems facing our world- pollution, climate change and wars for fossil fuels - as a cleaner, safer, more just and equitable solution is made available everywhere.

Where can the Holcomb energy system be deployed?

The Holcomb Energy System can be deployed in areas where no electrical grid infrastructure exists. One in five people worldwide are living with no electricity and millions more have just intermittent access. We can make rural electrification accessible, affordable and 100% clean.

How many generators does connect Saint Helena have?

We have 4 generators which have a total capacity of 5,400kW. Connect Saint Helena Ltd is committed to reducing reliance on diesel power generation by harnessing renewable energy sources. Renewable energy is cheaper to produce and does not harm the environment.

How can connect Saint Helena reduce reliance on diesel power?

Connect Saint Helena Ltd is committed to reducing reliance on diesel power generation by harnessing renewable energy sources. Renewable energy is cheaper to produce and does not harm the environment. We currently have 12 wind driven turbines located at Deadwood Plain. These turbines provide in excess of 20% of the islands electricity.
