

Why is Saudi Arabia investing in solar energy?

Leveraging its abundant sunshine and vast desert areas, Saudi Arabia is now pivoting to solar energy, aligning with its Vision 2030 plan to diversify its economy and ensure sustainable growth by reducing oil dependency and investing in renewable energy.

Can solar energy be used in Saudi Arabia?

The average energy from the sunlight falling on Saudi Arabia is 2200 thermal kWh/m² (Alawaji, 2001), and it is therefore worthwhile to attempt to generate clean energy in the country via direct sunlight through PV cells. Applications of solar energy in Saudi Arabia have been growing since 1960.

Which solar energy projects are completed in Saudi Arabia by 2030?

The Lunch of Saudi Solar Energy Program Sakaka, Al Shuaibah, and Sudair Solar Energy Projects have been completed. By 2030, the goal is 40GW PV solar and 2.7GW (CSP) concentrated solar power capacity.

Why is Saudi Arabia moving towards solar energy?

This move towards solar energy in Saudi Arabia is driven by a desire to reduce oil dependency, enhance economic stability amidst oil price fluctuations, and address environmental concerns by cutting carbon emissions, as highlighted by the Office of Energy Efficiency & Renewable Energy.

Where in Saudi Arabia is solar power coming from?

Key locations include Sakaka in Al Jouf Province, Al Shuaibah in Makkah Province, and Sudair in Riyadh Province, among others. These projects capitalize on Saudi Arabia's geographical position and favorable weather conditions to generate solar power. Solar energy is set to expand nationwide.

Is there a future for Saudi Arabia's energy sector?

KAUST's Stefaan De Wolf believes there is a great opportunity for cheap and abundant photovoltaics and other renewable sources of energy, such as wind, to electrify the country's energy sector. "There are huge opportunities for Saudi Arabia, thanks to its abundant solar irradiance," he says.
