

Can a Seplos BMS be configured for balancing?

The Seplos BMS can be configured when to do the balancing. The active balancers usually are not "smart" and support no configuration. You need to find an active balancer that will balance only under appropriate conditions. I.e. activate the balancing only under specific conditions. Let's say over 3.45V.

Is Seplos a good BMS?

I must add, for those looking for a BMS, I'm quite happy with the Seplos (10E). Yes its balancing ability is non-existent and the software can be confusing, but it seems pretty solid.

How do I configure a BMS connector?

Transfer the bms_connector folder from the repository into the custom_components directory within your Home Assistant configuration. Restart Home Assistant. Access the Integrations page in the Home Assistant UI. Click the "+" icon at the bottom. Search for "BMS Connector" and start the configuration process.

This Seplos BMS 3.0 Type A has integrated communication ports and status lights on one board. Model 13S and 14S are suitable for NCM batteries, while 15S and 16S are for LFP batteries. This BMS model is satisfied for 48V 200A charge-discharge current batteries and has been widely applied for the Stackable Mason 280 Series, ...

You do need to unplug SA when you go into BMS configuration mode, but you have to disconnect the other BMS comms wires anyway to do that. ** SA does have some "quirks" with Seplos BMS cell voltages (hence wanting to run the PC app as well), but several people have reported to SA. Hopefully a fix will occur "soon".
