

Amid the global energy crisis, Serbia, like all other European countries, is under the imperative of ensuring energy security for its citizens and industry. That can be achieved systemically, with long-term planning to accelerate the construction of solar and wind power plants as the fastest and probably the cheapest investment option. That ...

UNECE Renewable Energy Uptake: Development of Renewable Energy in Serbia 4 of 4 Sources IRENA, Energy Profile Serbia, 2019 IRENA, Renewable Energy Prospects for Central and South-Eastern Europe Energy Connectivity (CESEC), 2020 IRENA, Cost-competitive renewable power generation: Potential across South East Europe, 2017 IEA, Country Profile ...

Yesterday, our CEO, Miloš Colić, participated in the action of planting a tree as a symbol of Israeli-Serbian friendship. The tree he had the honor to plant symbolizes the partnership and collaboration we share with Enlight Renewable Energy Ltd (ENLT). The Embassy of #Israel in #Serbia organized a tree planting event yesterday in the "Forest of the Future," which will ...

o Reduction of energy consumption through energy efficiency measures. The draft plan fully recognizes that Serbia needs to transition from fossil fuel-based generation to clean energy solutions to fuel future economic growth and meet Serbia's ...

After more than 30 years of dormancy, the concept of incorporating nuclear energy into Serbia's energy mix is experiencing a significant resurgence. This renewed interest is largely driven by the new Proposal for the Law on Energy, which aims to lift the 1989 ban on constructing nuclear power plants. This movement is also backed by multiple agreements ...
