

What is sunculture & how does it work?

SunCulture is scaling a proprietary technology platform that switches rural African farmers from carbon-emitting fuel pumps to solar-powered irrigation, then on-sells other productive goods and services. SunCulture uses carbon revenues and financial services to make solar-powered irrigation more affordable than dirty fuel pumps.

How does sunculture make solar irrigation more affordable?

SunCulture uses carbon revenues and financial services to make solar-powered irrigation more affordable than dirty fuel pumps. SunCulture is the largest distributor of solar irrigation for smallholder farmers in sub-Saharan Africa.

How important is sunculture's weather model?

SunCulture's weather model and potentially in the future yield models, as well as data such as water table depth maps, represent highly valuable data to lenders and insurers, and other players across the agricultural and environmental value chain.

Dizela?i (Cyrillic: dizelashi; singular dizela?, Cyrillic: dizelash) was an urban street youth sub-culture popular in the 1990s in Serbia has been described as a mainstream fashion and social subculture, [1] that of a working class, similar to the British chav, French racaille [] and Russian gopnik. [2] The French movie La Haine (1995) is often mentioned in relation to these ...
