While the five-figure price tag for home solar often gives people sticker shock, it's important to remember that going solar is like buying 25 years" worth of electricity in bulk. It may cost more upfront, but it is much more affordable than buying electricity at the retail rate from a utility. ... Home solar systems typically feature 10-20 ...

The first solar power system for the island was set up way back in 2000, an incredible 24 years ago. Subsequently two other systems were put in place over the years to replace obsolete and damaged technology. The very harsh environment on the island is not kind to technology and the solar systems age rapidly, as do other equipment.
