

What is the Angola solar project?

The Angola Solar Project creates new opportunities for Angolan communities that will no longer be forced to rely on and pay for gasoline or diesel generators. Each one of the five projects that comprises the Angola Solar Project will supply the needs of 500,000 Angolan homes, mainly in rural areas.

What is Sun Africa doing in Angola?

Serving as its second large-scale solar project in the country, Miami-based utility-scale solar project developer, Sun Africa, will deploy 728 MW of solar photovoltaic mini-grids with battery storage and home power kits, which will support the electrification of more than two million people in four southern Angolan provinces.

Will Angola get 60% electricity by 2025?

Angola has set a target of 60% access to electricity by 2025 under the strategic plan 'Visao 2025,' of which solar is poised to play a central role. Supporting electrification as well as diversification, solar projects are being rolled out by the government alongside international partners and project developers.

Will a 150 MW solar plant help Angola?

An agreement for the development of a 150 MW solar plant was signed between Angola's Ministry of Energy and Water and UAE-based renewable energy company Masdar in Dubai last December. The 150 MW project will produce electricity to power 90,000 homes, contributing to job creation, emissions reduction and efforts to increase national electrification.

Who owns solar power in Angola?

The asset is owned, run and financed by French energy giant TotalEnergies in partnership with Sonangol and local renewables company Greentech - Angola Environment Technology. In May 2022, President Lourenço approved a contract worth USD 1.02 billion for the development of new solar projects with the aim of electrifying 60 communes.

What is the solar potential of Angola?

International players are showing increased interest in Angola's solar potential, with many projects expected to be operational within two years. Angola's estimated solar potential: 16.3 GW
Installed solar capacity targeted for 2025: 800 MW
