

Expanding energy ties. Azerbaijan (population 10.3 million), which is the host of this year's global climate summit COP29, is the epitome of a country experiencing carbon lock-in. Oil and gas production contributes roughly half of the South Caucasus republic's GDP and half of all its national budget revenues, as well as more than 90 percent of its export earnings.

In line with the country's commitment to diversify its economy and reduce greenhouse gas emissions, Azerbaijan aims to increase its installed power capacity from renewable sources to 30% by 2030.

The Ministry of Energy of the Republic of Azerbaijan. Development of the Renewable Industry in Azerbaijan; Ministry of Energy of the Republic of Azerbaijan: Baku, Azerbaijan, 2020. Mustafayev, F. The Potential Role of Renewable Energy in Providing Energy Security of Azerbaijan. Unpublished. Ph.D. Thesis, University of Gdansk, Sopot, Poland, 2021.

In 2023, Sungrow completed Azerbaijan's first and largest utility-scale solar project, a 308 MWp plant that now generates around 500 million kilowatt-hours of electricity annually, providing ...

Alternative Energy in Azerbaijan -- Project Video from COP29 AZE Leading the Global Renewable Market and ESG Excellence. Beyond this notable project, Sungrow's influence extends globally. As the largest supplier of solar and energy storage solutions worldwide, the company is committed to advancing the global energy transition. Sungrow's ...
