

What is the current state of energy in Sierra Leone?

The current state of Sierra Leone's energy sector is in acute need of improvement: 80% of Sierra Leoneans do not have access to electricity [1]. Of those that have access, 17% are connected to the grid and another 2-3% are connected to solar, mini-grid or portable home energy systems [ibid].

What is a Sierra Leone energy roadmap?

The roadmap [1] is a document that identifies, at a high level, what the government wants and how they want it. It lays out a vision for the energy sector in Sierra Leone. The intent is for IPPs proposing projects to fit into the vision defined by the roadmap.

How can the energy sector improve in Sierra Leone?

For the energy sector in Sierra Leone to improve and meet these targets at the rate required, some transformative changes are needed. Robust and resilient solutions, acceptable to a range of different stakeholders, are needed across the energy sector.

What type of energy is used in Sierra Leone?

In Sierra Leone, over 80% of energy is consumed as biomass, with the largest source being wood fuel and charcoal.

What are Sierra Leone's energy policies?

It is therefore unsurprising that Sierra Leone's energy policies since independence have generally oscillated between the development plans of these political parties. The EDSA is responsible for distribution and revenue collection from consumers, as well as operation of the transmission grid below 33 kV.

Why did Sierra Leone join the Energy Revolution?

Sierra Leone was the first African country to sign the 'Energy Africa Policy Compact' with the UK's Government in February 2017. As part of the compact, Sierra Leone joined the Energy Revolution initiative, committing to reach 250,000 households with modern energy solutions by 2018.
