

What is MACSE & how does it work in Italy?

Crafting a new market design Italy's push towards a regulated framework for BESS investments is anchored in the MACSE (Electricity Storage Capacity Procurement Mechanism). This innovative regulatory mechanism is designed to provide long-term investment signals for electricity storage assets.

What challenges does MACSE face in Italy?

Italy however faces several unique obstacles that are critical to understanding MACSE's role and the current regulatory landscape. Italy's transition is strongly dependent on rapid deployment of solar.

Is MACSE a good investment for the Italian battery market?

MACSE is set to provide a strong foundation for the Italian battery investment case- especially in southern & island zones - and many of the hurdles may diminish as the Italian market evolves, presenting interesting merchant opportunities in the future. Enhancing MACSE returns with merchant uplift

How will MACSE tender targets affect Bess investors?

MACSE tender targets will adapt to the zonal need for storage, but market inefficiencies in predicting fundamental value drivers (e.g., RES buildout, lack of flexibility, interconnection constraints) will likely create locational merchant upside for BESS investors.

What is MACSE policy support?

The catalyst for this is the implementation of the new MACSE policy support mechanism, offering 15 year indexed contracts on up to 100% of asset capacity. MACSE is a game changer. 15 year contracts provide key downside risk protection for infrastructure investors.

Is MACSE a good investment?

MACSE is a game changer. 15 year contracts provide key downside risk protection for infrastructure investors. They also ensure highly bankable projects given a strong credit counterparty (the government backed system operator Terna). There have been some important updates this month that impact investors targeting MACSE support.

Sierra Leone is no exception, with only 26% electrification, mainly in urban areas and peri-urban areas¹. The private sector is pivotal if the country is to achieve 85% renewable energy ...
