

R50 Bar. The R50 Bar is a high efficiency, shockless static bar for use on webs traveling up to 2,500 fpm and in hard-to-reach applications. The R50 Bar is designed for easy cleaning and offers a mounting channel with full length adjustment.

As a result, the anti-static bars connected to the power unit produce positive and negative ions simultaneously. This ensures optimal neutralization of static charges even at very high velocities/speeds. This power unit is fitted with two high-voltage indicators and an on/off switch with an indication light.
