

Smart flower solar panel price St Kitts and Nevis

How much does a smartflower solar panel cost?

Now, let's talk about the numbers. How much does the SmartFlower cost? Before applying for all incentives and tax credits, the SmartFlower solar panel system ranges in price from \$25,000 to \$30,000 with the average cost to install at \$27,000. There are two models that you can choose from, and this is why the price can vary.

Where can smartflower solar panels be installed?

Smartflower's solar solutions can be installed in virtually all locations across North America. The company is actively expanding its network of certified installers and is committed to securing installation services in areas where it currently lacks a presence.

Is smartflower a good solar system?

Despite its high efficiency, Smartflower's cost is significantly higher than traditional solar solutions. Equipped with self-cleaning panels and a monitoring app, Smartflower offers models for both grid-connected and off-grid setups, including an EV charging option.

What are smartflower solar units?

The innovative and visually striking Smartflower solar units, which mimic the sun-tracking movement of real flowers, are rarely seen in residential settings, largely due to their substantial price point. Smartflower stands out in the solar energy market with its distinctive design, blending functionality with artistic flair.

Why should you choose smartflower solar panels?

The SmartFlower's unique design allows for natural cooling of its solar panels resulting in as much as an additional 10% increase in productivity.

How tall is a smartflower Solar System?

Its design facilitates an installation process that is as straightforward as possible for a solar system of its scale. With its solar "petals" extended, Smartflower reaches a height of 16 feet. The inverter and optional batteries are located within its base.

Apple Footer. The display has rounded corners that follow a beautiful curved design, and these corners are within a standard rectangle.
