

Will Mexico's solar energy project go faster?

"It has to go faster." In April, Mexico plans to power up the first phase of a huge solar energy project near a beach town popular with tourists making the short drive from the United States. Once completed, the full \$1.6 billion project will have a generating capacity of 1,000 megawatts -- enough to power some 500,000 homes.

Will Mexico's solar power capacity be driven by solar plant projects?

The development of Mexico's utility-scale solar power capacity is predicted to be driven mainly by solar plant projects. The government of Mexico proposed a new solar project that could be recognized as the largest PV plant in Latin America and top 8 of the world's largest solar plant once completed.

Why is solar energy important in Baja Sur?

By transitioning to solar power, you reduce your reliance on fossil fuels, which are significant contributors to greenhouse gas emissions and air pollution. Utilizing solar energy helps decrease your carbon footprint, preserving the natural beauty of Baja Sur and contributing to global efforts to combat climate change.

Who is Baja solar?
