The Ministry of Energy of Romania has reopened a competitive solicitation for battery storage for the grid integration of renewable energy, seeking "at least" 240MW and 480MWh of resources.

Until very recently, PVSC exclusively meant coupling PV panels with batteries. First proposed in the 1970s (Hodes et al., 1976), integrated solar flow batteries (SFBs) have emerged as a promising alternative in the last several years (Li et al., 2019).They combine the functions of a solar cell or a photoelectrode in an integrated

device for harvesting solar energy ...
