

Pope Francis has unveiled plans for a solar plant that will let the Vatican City generate all its electricity from renewable sources. With an area of 121 acres or 0.44km² and a population of around 825, the Vatican City in Rome is the smallest independent state in the world by both area and population.. It has now earned itself another accolade: one of only a few ...

This project will augment existing solar installations within Vatican City and aim to ensure climate neutrality. The shift towards renewable energy has been a significant focus of Pope Francis's papacy. In 2015, he highlighted human-induced climate change as a critical concern and continued to advocate for environmental sustainability. The ...

However, the city's solar installations, which include solar panels installed on the rooftop of Paul VI's conference hall, mean that the city can now generate enough energy to power all of its ...

Vatican City, Jun 26, 2024 / 17:30 pm (CNA). Pope Francis has announced measures to transition Vatican City to using solar energy as its main source of electricity, as outlined in his latest motu ...

Pope Francis has announced measures to transition Vatican City to using solar energy as its main source of electricity, as outlined in his latest motu proprio titled Fratello Sole, or "Brother Sun.". The Holy Father has tasked the relevant Vatican governing bodies to collaborate with Italian authorities and build an "agrivoltaic system," which would use land in Santa Maria di Galeria ...

Pope Francis said the Vatican is committed to "contribute to the efforts of all states" to address climate change challenges. The new plant aims to provide 100% of the energy for the Vatican City State. The Vatican's global emissions were less than 0.0001% in 2022. Photo credit: Todor Stoyanov / Shutterstock

By Carol Glatz Catholic News Service VATICAN CITY -- Pope Francis appointed two special commissioners to start work on building an agrivoltaic system on a Vatican property outside of Rome that could supply the whole of Vatican City's energy needs. "There is a need to make a transition to a model of sustainable development that [...]

Solar energy is gaining traction everywhere, including at the Vatican. In an apostolic letter, Pope Francis announced that Vatican City will soon be powered by solar panels. The letter that was titled "Brother Sun," reported Euronews, was dated June 21, 2024 on the summer solstice which is the longest day of the year. The apostolic letter ...

Pope Francis has announced plans for the Vatican City to go solar through his latest motu proprio, Fratello Sole, or Brother Sun. The pope has delegated Vatican governing bodies to work with the Italian government to build an agrivoltaics system in the lands of Santa Maria di Galeria, located outside of Rome and an extra-territory of Vatican City.

However, the main focus of his discussion on obelisks is their size, and therefore the impressive challenges of quarrying and moving them. For Pliny, and for the Roman emperors he discusses, the point of having obelisks around is as a demonstration of kingly power - a contest that, naturally, the Romans have now won by bringing these things ...
