

These solar trackers are typically used in large utility-scale solar projects. A single-axis tracker can increase solar power production between 25% to 35%. Dual-axis solar tracker Dual-axis solar tracker does not only moves from east to west but also follows the sun's movement in the north and south direction.

Add more capacity to your solar power generator system by plugging in Solar Smart panels directly to the Solar Pod. An optional mains power input is also available with our hybrid power generators. This will by-pass the generator and ensure only solar/batteries/mains are used. 100% zero noise operation.
