By combining the highest performing solar products, solar grid technology, energy monitoring and solar home devices together, we help you gain control over your home and peace of mind for the future.

Solar panels are typically designed to have a 20- to 30-year lifespan -- although some can produce power for much longer than that. Damage from the elements can sometimes shorten this lifespan, and asset owners may find that they greatly improve their facility's output by repowering before a panel has reached its end-of-life.
