Lebanon's Minister of Energy, Walid Fayyad, has signed contracts with 11 companies in the private sector to construct solar power stations. The power stations will produce 15 megawatts of electricity and be sold at prices lower than those charged by state-run power company, Electricite Du Liban, which currently charges 17 U.S. dollars per kilowatt hour.

ME Green was one of the early solar power companies in Lebanon, but the sector has ballooned, from around 150 registered businesses in 2020 to more than 800 today, according to the LCEC's Khoury. These companies work on everything from small household systems--which start at \$2,000-\$3,500--to projects involving hundreds of panels or more.

That is, power can be generated from a plant or collection of plants when it is needed to meet peak system power loads. dlr, Deutsches Zentrum für Luft-und Raumfahrt e.V. dNI, Direct Normal Irradiance is the

amount of solar radiation received per unit area by a surface that is always

In the 21st Century, a critical benchmark for governments has been their ability to keep the lights on in their citizens' homes. Since 2021, Lebanon's state-run electricity company, *Électricité du Liban* (EDL), has only been able to provide electricity for 1-3 hours a day. Consumers are forced to spend the remaining 21 to 23 hours either in darkness or privately source electricity at ...
