

ICC-SRCC maintains and publishes the following ANSI-approved consensus standards with the International Code Council (ICC). They form the basis of the OG-100, OG-300 and OG-400 certification programs. The current editions of ...

Performance ratings allow for direct comparison of different tanks, and provide the key performance metrics needed for designers incorporating them into distributed heating systems. Company About Us

ICC-SRCC offers listings for all major codes and standards applying to solar heating & cooling products in North America. ICC-SRCC listings make it easy for solar product manufacturers to demonstrate code compliance. The program is designed specifically for the solar industry, from the experts at ICC-SRCC who know the technology and the industry.

No. OG-500 certification provides one option to satisfy the requirement in the ICC 900/SRCC 300-2020 standard, but it is not the only option. The current edition of the ICC 900/SRCC 300 standard simply requires that all solar tanks be listed and labeled as a component, unless the entire system was subject to testing as an assembly.

. EVALUATION SUBJECT BRAND: MorningStar ; MODEL: MS-26 . TYPE: Glazed Flat Plate.  
PRODUCT CERTIFICATION SYSTEM: The ICC-SRCC OG-100 certification program includes evaluation and performance ratings for solar thermal collectors as

ICC-SRCC maintains compliance assessment marks for its accredited programs. Listees with current certifications and listings are authorized to display them on marketing materials, websites, and product labels. This webpage summarizes ICC-SRCC's marks and how they may be used. These requirements are also summarized in the Usage Guide for ICC-SRCC Marks. Certified ...

ICC-SRCC requires periodic inspections for the OG-100, OG-300, OG-400 and listing programs for solar thermal products. Listees are notified early each year whether an inspection will be required on a given year. New listees must undergo an inspection within 6 months of the award of the first certification or listing.

The following testing laboratories are recognized by ICC-SRCC to conduct testing to the standards listed for

ICC-SRCC certification and listing programs. Recognized Testing Laboratories must comply with ICC-SRCC's requirements for quality management, testing competency and customer service and are evaluated annually. Manufacturers requiring ...

When manufacturers apply for a new ICC-SRCC certification, they provide basic information needed to get the process started. But once we get underway, we will need more detailed information about your product to confirm that it complies with standards and to generate performance ratings (if applicable).

Inspection times may vary depending on the number of certifications and details of the site. But generally, about 4-6 hours onsite. Inspectors may request some documentation in advance to reduce the time spent on-site.

PLEASE NOTE: All of the certification and listing reports posted this web site are valid, although some have renewal dates that have passed the case of the latter, the reports are currently undergoing renewal as required by ICC-SRCC policies and procedures. To obtain legacy reports or to inquire about the status of reports with renewal dates that have passed, contact ICC ...

The ICC-SRCC OG-100 certification program includes evaluation and performance ratings for solar thermal collectors as established in the ICC-SRCC Rules for Solar Heating & Cooling Product Listing Reports

ICC-SRCC launched the OG-500 certification program in 2024 to provide certifications for thermal energy storage equipment. It started with the certification of hot water storage tanks commonly used as components in solar thermal systems, commonly known as "solar tanks." These tanks may be certified to the ICC 903/SRCC 500 standard.
