

Is Madagascar ready for solar power?

With all regions of Madagascar enjoying over 2,800 hours of sunlight per year, the Grande Ile is the perfect location for development of solar power, with a potential capacity of 2,000 kWh/m²/year. The Government is counting on this potential to fulfill its objective of providing energy access to 70% of Malagasy households by 2030.

What is Scaling Solar in Madagascar?

Madagascar is currently the fifth country in Africa in which a Scaling Solar tender process was launched, after two tender processes in Zambia, one in Senegal, and another in Ethiopia. It is also the first Scaling Solar project to include solar energy storage requirements by pairing solar with batteries.

How much solar power does Madagascar have?

With only a 15% connection rate, Madagascar faces a chronic lack of access to electricity, which hampers its economic and social development. However, there is tremendous potential in terms of solar power, estimated at 2,000 kWh/m²/year as a result of the 2,800 hours of annual sunlight the country enjoys.

What is Nea Morondava solar power plant?

The solar PV power plant is the latest installation put into operation in the batch of three plants located in the SAVA region. This one joins the (New Energy Africa) NEA Morondava power plant for a total installed power of 6MWc.

How can the government finance large-scale solar plants?

To supplement public funds in order to finance large-scale construction of solar plants by promoting private investment, the International Finance Corporation (IFC), the private sector arm of the World Bank Group, is helping the Government set up a public-private partnership (PPP).

How many people in Madagascar have access to electricity?

Only 15% of the population have access to electricity with considerable disparity between urban (79%) and rural (8%) areas. GuarantCo has been the first company to mobilise local currency from commercial banks for utility scale solar projects in Madagascar.

Le développement du solaire ; Madagascar est en pleine expansion. Nous intervenons ; Madagascar depuis 2007 comme fournisseur d'équipements solaires tant dans le domaine du pompage solaire que dans le domaine de l'électrification solaire. Que ce soit pour la fourniture de kits complets ou la distribution de matériel, nous avons une large gamme de produits et services.
