

What is the Wind Energy Resource Atlas of Sri Lanka?

The Wind Energy Resource Atlas of Sri Lanka, completed by NREL, quantifies the country's wind energy potential. However, additional effort is necessary to bridge the gap between knowing the estimated wind resource from the atlas and developing a utility-scale wind energy facility.

How to choose a wind energy site in Sri Lanka?

To choose a wind energy site in Sri Lanka, the most important factor is the wind resource itself. The wind resource in Sri Lanka primarily varies according to exposure to the monsoon winds. The southwest monsoon is stronger and penetrates farther inland and to higher elevations than the northeast monsoon.

Is CEB responsible for wind energy development in Sri Lanka?

CEB, being the government-owned electricity generator in Sri Lanka, is ultimately responsible for all electricity generation, including wind energy development. Therefore, there is a close relationship between the regulatory, business, and political issues impacting wind energy development.

Is Sri Lanka's wind resource optimally matched to hydro-electric generation?

The wind resource in Sri Lanka does not optimally match the seasonal variations in hydro-electric generation. The maximum winds occur during the wettest periods, so wind power cannot be expected to significantly help mitigate capacity constraints in the dry seasons.

What incentives are available for wind energy generation in Sri Lanka?

Increased incentives for wind energy generation in Sri Lanka could facilitate the advancement of wind project development. Typical incentives include increased revenue tax holidays, production tax credits, and annual targets for renewable energy capacity or energy production.

Is Sri Lanka ready for wind power development?

Sri Lanka has considerable available land with wind resource potential sufficient for development. However, the near-term potential wind power capacity expansion is limited by the electricity transmission infrastructure.

Specifically for Sri Lanka, country factsheet has been elaborated, including the information on solar resource and PV power potential country statistics, seasonal electricity generation variations, LCOE estimates and cross-correlation with ...

The brand "Atlas" has been voted Sri Lanka's most loved brand 2017. The company is the market leader in school stationery and notebooks, pens, pencils and colour products, with products retailed in over 70,000 outlets across Sri Lanka. Atlas Axillia brands include "Atlas", "Zebra X", "Homerun" and "Innov8".

Owing to the high diversity of carbohydrate rich foods in Sri Lanka (Jayawardena and Herath, 2017), nearly half of the total food items in this exchange atlas fit to the food group of cereals, emphasizing that carbohydrate is consumed as the major energy source in this population (Jayawardena et al., 2014).
