

How can Sudan achieve energy self-sufficiency?

Encouraging solar and wind power in the country's energy portfolio could help Sudan achieve its goal of energy self-sufficiency. Egyptian policies such as nurturing and promoting renewable technologies and scientific research, feed-in tariffs, and tax exemptions could help Sudan achieve its objectives.

What is power in Sudan?

Power in Sudan Sudan is a country with immense renewable energy potential, possessing a high hydropower potential based totally on its location on the river Nile and other watersheds, a high wind speed mainly in its northern and western region, and high solar radiation throughout the country.

What are the challenges facing Sudan's energy sector?

Sudan's energy sector is facing numerous challenges: persistent blackouts, an inadequate energy infrastructure, and a poor and scattered government response .

How much energy does Sudan use?

Sudan is a net energy exporter. Primary energy use in Sudan was 179 TWh and 4 TWh per million persons in 2008. Wood and charcoal were principally used for household cooking and heating. Substantial quantities of wood fuels were also used by commercial operations--chiefly baking and brick making and, to a lesser extent, tobacco curing.

How can Sudan restructure its energy sector from Morocco?

One of the most useful strategies Sudan can adopt from Morocco is the use of new legislation and new policies to restructure the energy sector. This recommended adjustment could encourage future investments targeting renewable production and attract more foreign and local investors to participate in renewable production projects.

Can geothermal energy be exploited in Sudan?

Some of the few available studies have revealed such potential. Geothermal energy has been discovered in the Suwak in area, the Jebel Marra volcanic mountains, and other remote areas . Geothermal data collected from oil wells reveals huge potential for exploiting geothermal energy in many areas of Sudan.

MSNswitch is designed to automatically power-cycle its outlet when either; a) the internet connectivity is lost, or b) the network device crashes. It acts like a watch-dog, making sure that the network device monitored is responding. It is useful for auto-resetting router / ...
