

Is Iraq ready for solar power?

On the other hand, the Iraqi government has invited independent power producers (IPPs) to develop seven utility-scale PV solar power sites in the range between 30 and 300 MWp with a total power generation capacity of 755 MWp .

Is solar energy a good idea in Iraq?

Although Iraq tends to promote the country's solar energy in two ways: Utility-scale PV units could lead to a reduction in burning of oil and gas, and rooftop solar panels would help individual households reduce their own dependence on "expensive and polluting neighborhood generators".

Do solar panels adorn homes in Iraq?

In the mountains of Iraqi Kurdistan, solar panels adorn most homes, part of a small but growing effort to harness the sun's energy in Iraq. (AFP) The tranquil silence of Hazar Merd is striking in a country where the roar of large neighborhood generators used to provide back-up power is ever-present.

How many people use solar power in Iraq?

Nationwide, however, the use of solar power remains scarce. In nearby Sulaymaniyah, the second-largest city in northern Iraq's autonomous Kurdish region, only 500 out of the 600,000 households are equipped with solar panels, said Sirwan Mahmud, a spokesman for the province's electricity department.

Which countries are promoting solar energy in Baghdad?

In 2021, Baghdad signed an agreement with the Emirati company Masdar to build five solar plants with a combined capacity of 1,000 MW. To encourage renewable energy, Iraq's Central Bank in 2022 announced the allocation of \$750 million in almost zero-interest loans for individuals and private companies adopting solar power.

Will Iraq be able to harness green energy by 2030?

A recent World Bank report highlighted that more than 98 percent of Iraq's electricity is still generated from fossil fuels. Authorities say they aim to harness green energy to meet a third of the country's needs by 2030. But despite several major projects being announced with great fanfare, that has yet to materialize.
