

Why is Syria's energy sector in turmoil?

Syria's energy sector is in turmoil because of the ongoing civil conflict that began in the spring of 2011, with oil and natural gas production declining dramatically since then. Syria's energy sector has encountered a number of challenges as a result of conflict and subsequent sanctions imposed by the United States and the European Union.

Does Syria have electricity?

Syria also had separate entities for the generation and distribution of electricity. Syria's oil sector has been in a state of disarray since 2011. Production and exports of crude oil have fallen to nearly zero, and the country is facing supply shortages of refined products.

What happened to Syria's oil & natural gas industry?

Syria, previously the eastern Mediterranean's leading oil and natural gas producer, has seen its production fall to a fraction of pre-conflict levels. Syria is no longer able to export oil, and as a result, government revenues from the energy sector have fallen significantly.

What type of energy is primarily used in Syria?

In Syria, most energy is based on oil and gas. Some energy infrastructure was damaged by the Syrian civil war. In the 2000s, Syria's electric power system struggled to meet the growing demands presented by an increasingly energy-hungry society.

What happened to Syria's electricity generating capacity in 2012?

Syria's electricity generating capacity was 8.9 gigawatts in 2012, although damage to electricity generating facilities, high voltage power lines, and other infrastructure has likely reduced the country's effective capacity. Electricity distribution losses, already 17% of total generation in 2012, have likely climbed even further.

Is Syria a natural gas importer?

In 2008, Syria became a net importer of natural gas, but the country's current state of conflict--and sanctions--have affected the ability of Syria to receive natural gas. The only source of natural gas imports, the Arab Gas Pipeline, became the target of attacks as the conflict intensified, forcing the pipeline to shut down.

"Prism is easier to use and clearer than managing risks by spreadsheet." "The visibility of our risks improved massively using Prism and enabled us to be consistent in our management of the project." "Prism is a powerful but cost effective tool for managing risks.
