The company seeks to provide investors with an attractive and sustainable dividend over the long term by investing in a diversified portfolio of utility scale operational energy storage systems, which utilise batteries and may also utilise generators, located in Great Britain, Northern Ireland, and the Republic of Ireland.

The dynamics of the UK energy market are changing rapidly. Renewable energy's market share in the UK is forecast to double from 40% to 80% by 2050 as the country moves from relying on fossil fuels towards an energy mix dominated by renewable energy and supported by battery energy storage.. We believe that energy demand should double in the same period.
