

What are the requirements for Bess facilities?

This legislation requires consideration of risk control measures and safe systems of work, which for BESS facilities may relate to: The ISO standard describes environmental management systems for organisations with a systematic approach. The standard describes environmental management from planning through to performance evaluation.

What are the installation and safety requirements for Bess?

AS/NZS 5139:2019 details the general installation and safety requirements for BESS. This standard applies to battery systems with a nominal voltage between 12 V D.C and 1500 V D.C, with a rated capacity equal to or greater than 1kWh and no more than 200kWh.

Do we need a state-by-state regulator resourcing & skill to assess Bess facilities?

There is a need for State-by-State regulator resourcing and skill to assess BESS facilities. Therefore, owners of complex installations (such as BESS facilities) should provide funding moving forward.

19 March 2020: Developer Penso Power said it would later expand the planned 100MW project by another 50MW, having secured land rights, planning permission and a grid connection offer to extend the site in ...
