

What is the energy potential of Niger?

Niger has significant energy potential, rich and varied, that is weakly exploited. It consists of biomass (firewood and agricultural residues, the main source used by households for cooking), uranium, mineral coal, oil, natural gas, hydroelectricity and solar energy.

When did Niger sign the European Energy Charter?

Niger signed the European Energy Charter (1991) in April 2015 and the International Energy Charter (2015) in May 2015, which represents a strong signal from the authorities of their commitment to ensure better protection of foreign investments in the Republic of Niger. The process of ratification of the Treaty is in progress.

Is Niger a member of ECOWAS?

The outcome of this process has no doubt because Niger is a member of the Economic Community West African States (ECOWAS). The ECOWAS protocol on energy, which was ratified by Niger in 2005, developed on the basis of principles of the Energy Charter Treaty.
