

How much does electricity cost in the BVI?

The 2015 electricity rates for BVI are of \$0.16 to \$0.24 per kilowatt- hour (kWh),lower than the Caribbean regional average of \$0.33/kWh. Like many island nations,the BVI is almost 100% reliant on imported fossil fuels for electricity generation,leaving it vulnerable to global oil price fluctuations that directly impact the cost of electricity.

Is the BVI reliant on fossil fuels?

Like many island nations,the BVI is almost 100%reliant on imported fossil fuels for electricity generation,leaving it vulnerable to global oil price fluctuations that directly impact the cost of electricity. Electricity Sector Data The British Virgin Islands Electricity Corporation (BVIIEC) was formed by ordinance in 1978.

How does Peter Island generate electricity?

The outer islands already use renewable resources to produce energy. Peter Island generates 70% of its electricity from two Wind Energy Solutions hybrid turbinesrated at 250 kilowatts (kW) each,backed-up by diesel generators. Cooper Island generates more than 75% of its electric needs from solar PV and uses solar water heating.

Can I use a standby generator in the British Virgin Islands?

In the British Virgin Islands,use of a standby generator is only permitted when the BVI Electrical Corporation's power is off. Installation of a standby generator must be pre-approved by the Government.

From its initial start as private/public autonomous and individual producers of electricity, the government owned public electricity supply was established in the 1950's. At that time, the BVI's main source of electricity was produced by one 20 KW generator, which provided six hours of service per day and supplied 63 consumers between Government house and...
