

What happened to thornova solar?

With this in mind, we have decided to move past the Sunova Solar brand and continue our future as Thornova Solar. Our latest high-density PV panels stand for exceptional electricity production and are used in applications ranging from floating solar systems to lowlands and alpine altitudes.

Who is thornova solar?

Thornova Solar is a U.S.-based solar company that offers high-performance solar modules for the utility, commercial and residential solar markets in North America.

Why is thornova solar moving away from Sunova solar?

As climate change is one of the most dramatic challenges of our time, with our solar modules we want to contribute to the preservation and defence of a planet worth living on. With this in mind, we have decided to move past the Sunova Solar brand and continue our future as Thornova Solar.

Will thornova solar continue to provide technical support?

For time being until we do the full transition to Thornova Solar, you will receive official quotations and invoices under the Sunova Solar brand. We will continue to provide the best technical support for your purchased Sunova Solar, co-branded and later Thornova Solar products.

Where are thornova solar panels made?

While having manufacturing capacities in Vietnam, Thornova strategically focuses on the North America markets. Their power output ranges from 400W to 720W, while their efficiency generally floats from 20.5% to 23.2%. Thornova solar panels are backed up with a 15-25-year product and 25-30-year performance warranty.

How much do thornova solar panels cost?

The performance is guaranteed at 84.8% - 87.4% of the panel's original power output after 25 - 30 years of operation. Pricing details of Thornova solar panels are not easy to source on the market. Yet manufacturing in Asia is much cheaper than in the US, so we expect panels to average between \$0.6 and \$0.8 per watt.
