

What is Tilt Renewables?

August 2021: Tilt Renewables scheme of arrangement was implemented with the New Zealand assets purchased by Mercury NZ and the Australian assets by Powering Australian Renewables Fund - itself a consortium of AGL Energy, QIC Global Infrastructure Fund and the Australian Government's Future Fund.

Is Tilt Renewables mulling a higher takeover offer?

Tilt Renewables is mulling a higher takeover offer, throwing into doubt the \$2.7 billion deal struck with AGL Energy's renewable energy fund and Mercury NZ. The clean energy sector in the Australian stock market is not yet sufficiently investable, despite the phenomenal performance of a few. Infratil has almost enough cash to swallow Vocus Group.

What happened to Tilt Renewables?

October 2016: Tilt Renewables was demerged from Trustpower, with Tilt Renewables taking ownership of all operational wind assets and the wind and solar development pipeline, and Trustpower retaining all hydro assets. Tilt Renewables was dual listed on the ASX and NZX with the ticker TLT.

Will Tilt Renewables take over QIC Ltd & AGL Energy?

Tilt Renewables has locked in a more lucrative and final takeover deal at \$NZ8.10. QIC Ltd and AGL Energy need to decide whether to get into a bidding war with Canada's CDPQ. Tilt Renewables is mulling a higher takeover offer, throwing into doubt the \$2.7 billion deal struck with AGL Energy's renewable energy fund and Mercury NZ.

Who owns Tilt Renewables?

It holds the assets of both former entities, and is owned 40% by QIC, 40% Future Fund and 20% AGL. Below is the list of currently generating assets owned by Tilt Renewables

Did Powar take over Tilt Renewables?

The takeover was successful in August 2021. PowAR took over the Australian assets and operations of the former Tilt Renewables, making it the largest private developer and generator of wind and solar electricity in Australia. The combined Australian organisation was subsequently renamed back to Tilt Renewables.
