

Does Timor-Leste have electricity?

In Timor-Leste, the access to electricity varies significantly, from about 80 percent in the capital Dili to 10 percent in outlying regions. 24-hour electricity is available only in Dili and Baucau (the two largest towns). According to 2004 census data, at least 185,000 households lack access to the electricity grid.

What are the main sources of energy in Timor-Leste?

Fossil fuels in Timor-Leste are imported from neighbouring countries such as Indonesia and Australia. Seventy-five percent of oil imports are used for electricity production, with the remaining 25 percent consumed in the transport sector. Other sources of energy. Lighting needs are met by the use of kerosene, plant oils and batteries.

How many people benefited from a rural energy programme in Timor-Leste?

The programme reached 1,875 individuals in 375 households, with multiple impacts on quality of life, income and livelihoods. The programme also developed a national Rural Energy Policy, creating an overarching framework for future government activities in improving rural energy access in Timor-Leste.

Does predp paved the way for future energy access in Timor-Leste?

Conclusions Although PREDP was a pilot programme, it has paved the way for future energy access activities in Timor-Leste. It was the first rural energy programme in Timor-Leste to include a capacity development component, and to have the GoTL and local communities as major partners.

What is the Sepe doing in Timor-Leste?

Following PREDP completion and in response to requests from other communities, the SEPE has begun implementing a similar but larger-scale programme throughout Timor-Leste. Specifically, the SEPE has developed an action plan that includes up-scaling distribution of biogas plants and expansion of SPV panel distribution.
