Ideally, you should aim to have the battery at around 50% capacity before storage. To charge your battery to 50%, you can use the charger that came with your EGO equipment. Simply connect the battery to the charger and plug it into a power source. Allow the battery to charge until it reaches approximately half of its full capacity.

Apart from the maintenance aspects for the battery mentioned, I use an old ammo box (can get them from Amazon). Take out a little of the seal so it's not airtight. if a lipo explodes, you'll get a lot of smoke, but little fire damage in the immediate area. I also store mine in a lipo bag in the box for extra security!
