

Can Tokelau support itself with solar energy?

Tokelau, an island nation in the South Pacific, is now completely able to support itself with solar energy. Elly Earls met Joseph Mayhew of the New Zealand Aid Programme to find out how this tiny collection of atolls has become almost 100% self-sufficient in less than 12 months.

How much electricity does a solar system provide in Tokelau?

Each system alone is among the largest off-grid solar power systems in the world, and together they are capable of providing 150% of current electricity demand in Tokelau, a much higher amount than the 90% that was originally planned for.

How much money does Tokelau spend importing fuels a year?

Tokelau spends about \$829,000 every year to import fuels. The government of Tokelau now plans to spend these savings on other essential services like health and education. The savings will also be used to repay the grants and financial assistance the government received from New Zealand government for this project.

A PAYGo solar company with a strong credit department could use the knowledge of its customer's risk profile, payment behavior, and desires to build a suite of leasing and other financial products. Even if most PAYGo companies never get this far, the financial inclusion implications of the financial products they already offer are exciting.

However there is new hope, a new model for providing access to electricity - It is called Pay as you go-technology (PAYGO). In the last three years, existing technology such as photovoltaic panels, energy efficient LED lamps, mobile money, and GSM data transfer protocols, have been combined in new efficient and affordable Solar Home Systems.
