

Is Sri Lanka a viable alternative energy source?

Moreover, Sri Lanka has also identified the potential for wind, bioenergy, and solar as alternative energy sources in the past two decades. However, the current contribution from these three renewable sources in comparison to hydroelectricity remains significantly low.

What are Sri Lanka's energy policies & strategies?

Sri Lanka's energy policies and strategies strongly focus on developing conventional and nonconventional renewable energy sources for generating power. Promoting domestic energy resources has become one of the main policy components in Sri Lanka.

What percentage of Sri Lanka's energy source is renewable?

However, as of 2018, only 39 % of Sri Lanka's energy generation capacity was harnessed through renewable energy sources. The continuous increase in electrical energy demand and the drastic increase in vehicle population over the past few years have resulted in much of its annual income being spent on purchasing fossil fuels from foreign countries.

How can Sri Lanka achieve net-zero achievement?

Country's net-zero achievement requires policy to action transitions at a state level. Sri Lanka as a country has tremendous potential for harnessing energy from renewable sources such as solar, wind, and hydro. However, as of 2018, only 39 % of Sri Lanka's energy generation capacity was harnessed through renewable energy sources.

How much energy does Sri Lanka generate?

Until the late 90s, hydropower acted as the country's key energy generator producing nearly the entirety of Sri Lanka's energy requirement. Over the past decade, hydroelectricity has continued to generate between 3.5 to 7 TWh of energy whilst remaining one of the top three energy-generating sources in the country.

Does Sri Lanka have solar energy?

Furthermore, Sri Lanka has also seen an increase in the energy generated through bioenergy sources (geothermal, biomass and waste energy) with this segment producing approximately 250 GWh of energy by 2020. However, despite its potential, solar energy has had an uninspiring growth until 2016.
