Pope Francis has announced plans for the Vatican City to go solar through his latest motu proprio, Fratello Sole, or Brother Sun. The pope has delegated Vatican governing bodies to work with the Italian government to build an agrivoltaics system in the lands of Santa Maria di Galeria, located outside of Rome and an extra-territory of Vatican City.

Solar and clean transport, in particular electric mobility, offer very interesting synergies. For road transport in the light, a typical rooftop 5-kW solar panel can easily produce the daily amount of electricity needed for the average commute of an electric vehicle.

Lots of solar panels, heat pumps, the works. It's not cheap, though - many churches are very tall and historical. Even at its simplest level, in a normal house you can install new efficient lights with a guy and a stepladder, but in a church it requires extensive planning and a shitton of scaffolding.

Vatican City is on track to become the 8th country in the world to generate 100% of its electricity from renewable energy, following Pope Francis' announcement about plans to build a large solar plant.
