

Can Montenegro reduce energy demand?

Montenegro has great potential for reducing demand through more efficient energy use. According to IEA statistics, Montenegro's energy intensity has been falling slightly in recent years but is still more than twice that of the EU-28. Inefficient practices such as using electrical heaters for heating are widespread.

How much electricity does Montenegro need?

With around 621 000 inhabitants, Montenegro's electricity needs are mainly met by the 225 MW lignite power plant at Pljevlja and the 307 MW Perućica and 342 MW Piva hydropower plants, all run by state-owned utility Elektroprivreda Crne Gore (EPCG).

How stable is Montenegro's wind farm?

Over the 10-day fossil fuel free period we discussed, the Krnovo wind farm contributed 28% of Montenegro's electricity generation and the system was stable. According to our experience in the past two years or so, the forecasting error on the day-ahead level is no greater than 5%.

Does Montenegro have a solar farm?

The Komarnica valley is also nominated as an Emerald and Natura 2000 site and includes the unique Nevidio Canyon, which is protected as a Natural Monument. Montenegro has so far made little use of its solar potential, but in 2018 a tender for a 250 MW solar farm was completed. However, its construction has been delayed by spatial planning issues.

Does Montenegro have a natural gas pipeline?

Montenegro has no infrastructure for natural gas distribution and does not currently extract oil, though the government is interested in oil and gas production in the Adriatic Sea. It is also interested in the Ionian-Adriatic Pipeline, an offshoot of the Trans-Adriatic Pipeline that runs through Albania.
