The battery can store the extra energy produced from solar panels during the day to avoid using electricity at a more expensive rate. The peak time-of-use (TOU) rates can be double the price compared to off-peak rates. In such a scenario, a solar battery storage system can come in handy for using electricity without having to pay such a high price.

Solar Panel efficiency is a measurement of a solar panel's ability to convert sunlight into usable electricity. For example, if the sun shines on a high-efficiency solar panel with a 20 percent rating, then 20 percent of the sun's energy will be converted to electricity. When it comes to solar panels, this is far from an exhaustive list.

At Sona Solar Zimbabwe, we go beyond just providing a list of battery options. We offer expert advice to help you choose the most suitable lithium battery for your specific solar system needs and budget.
