Turbo Power Systems(TM) turbochargers are used in all applications including low, medium, and high speed small and large bore, diesel, natural gas, and dual-fuel engines. Why Turbo Power Systems? Consistent quality turbochargers that meet or exceed OEM specifications.

This improved network comes in the form of a Smart Grid which can provide a more sustainable, reliable and affordable electricity supply. Smart Grids are intelligent networks that monitor the distribution of electricity and enable a two-way dialog where energy can be exchanged between utilities and their customers.

Vehicle to Everything (V2X) We're pioneering new technology for energy infrastructure. Designed to further develop and enhance the transfer of energy between electric vehicles, buildings and the network, V2X capabilities will improve the efficiency and sustainability of energy systems, by enabling the use of EVs as a flexible source of energy storage and distribution.

We are a leading designer and manufacturer of cutting-edge power conversion systems with applications for industry, transport and energy. We design and manufacture everything in-house at our 55,000sqft facility in Gateshead, shipping our products worldwide.

It changes its name to Turbo Power Systems (TPS) and it is moved from the London Stock Exchange to the AIM Market. 2006 . TPS wins Beijing, Toronto Rocket & CTA contracts with Bombardier Transportation, in a total value of \$30M. ... Turbo Genset acquires Intelligent Power Systems in Gateshead. 2000 .

Turbo Power Systems (TPS) | 5,618 followers on LinkedIn. Powering Intelligent Solutions | Established in 1986, Turbo Power Systems (TPS) is a leading designer and manufacturer of power conversion technologies supplying customers in the transport, energy and industrial sectors. We provide intelligent energy solutions for

a smarter tomorrow. Supporting energy ...

All of our high speed permanent magnet machines are designed with power ratings up to multi MW and speeds up to 160,000 rpm. Our machines have a varied range of applications, most commonly they are designed to run industrial compressors, oil and gas compressors, HVAC compressors, laser and fuel cell cooling systems.

Going Bi-Directional Our next step was ground breaking. We realised that the power transfer capability we had created would have significant impact on the burgeoning market for EVs. With our DGI providing a bi-directional gateway between the Grid and the charging scheme and our technology developed for London Underground enabling bi-directional ...

Direct import/supply of Turbochargers, Turbocharger parts & related components. Performance Accessories - nitrous oxide refilling, turbo-timers, dump valves, gauges, etc. Sole Official Zimbabwe Distributors for: - Bailey Motorsport (UK) ...

Power Systems Africa is one of the leading generator specialists in Zimbabwe, with a strong track record of providing high-quality Gensets & Allied services to Mines, Refineries, Manufacturing Plants, Factories, Shopping Malls, Construction Sites, Schools, etc. throughout Zimbabwe.

Power Electronics With over 40 years experience in Power Electronics and High-Speed Electrical Machine design, development, test and manufacture, we remain at the very forefront of the clean technology industry, having delivered over ...

Potenza. Delivering the Power of Tomorrow. Today. As early as 2016, we began to understand the power of bi-directional DC-DC charging and the impact it could have on overcoming the de-carbonisation challenge. Our 40 plus years developing world-leading power systems for the rail and aerospace industries armed us with the technology to enable it.

This has determined HVAC& R businesses to focus more and more on energy-saving technologies with lower carbon footprint. TPS have developed a series of tailored High-Speed Permanent Magnet (HSPM) motors with both standalone and integrated Variable Frequency Drives (VFD), for inclusion with Air Conditioning Compressors of different chiller capacities.
